SWITCH OFF THE SUN

# Welcome

## KNOW OUR BUSINESS

At SolarScreen Pakistan, we strive to understand the science of solar heat gain. Our experienced R&D team enables us to develop unique products that offer unrivalled performance. Our innovative products are backed with our excellent service to our clients. It is no surprise, SolarScreen Pakistan has become a trusted name for heat control solutions.

We believe heat control solutions should cater for the local climate. Most companies in the window film industry have a fixed set of products that they promote for every country and region. SolarScreen Pakistan moved away from this concept to offer products that are tailor made for the local climate.

Our responsibility towards the environment is well understood at SolarScreen Pakistan. High energy consumption has an associated high carbon footprint. Our products will not only help reduce your electricity costs, they help you fulfil your responsibility towards the environment.

Our 4 core business values form the basis of every product or service that we offer. These values help us set our direction for the future and ensures we deliver solutions of high value to our clients.

01

Constant Innovation

02

High Performance Products

03

Responsibility to the environment

04

Exceptional Customer Service

*In 2019, SolarScreen helped reduce the power consumption for our clients by 22,000 Megawatts. This carbon footprint is equivalent to planting 75,000 trees.*

Measure and plot the thermal performance of the premises and advise suitable solutions.

Team of trained professionals arrive at an agreed time to execute the agreed solution.

Provide a comprehensive warranty which includes after sales service using a single point of contact.

# About Us

Professional Process & Solutions!

When dealing with SolarScreen Pakistan, you will be dealing with professionals. Our staff include engineers and surveyors, to offer you the best advice.

## Who We Are

At SolarScreen Pakistan, we specialise in heat control. We have a presence in major cities of Pakistan. Our teams in each city consists of qualified and trained sales staff, professional installers and an active after-sales support team. Your feedback is extremely important to us. We constantly strive to offer the best service and are always looking for a way to improve our offering.

## Our Mission

Our mission is to make your living environment more comfortable.

We aim to be the experts in our field, provide innovative products with proven results and offer complete peace of mind to our customers.

## Why SolarScreen?

At SolarScreen, aesthetics are an important part of our solution's design. Unlike traditional heat control solutions like sun shades and chick blinds, our customers don't have to compromise on the aesthetics of their premises to achieve heat control.

As a large company we are able to derive substantial savings from economies of scale, savings that we pass on to our clients by offering them competitive prices.

SolarScreen Pakistan's products are manufactured under an ISO 9001 compliant quality management system. Our products have been tested in CE accredited laboratories for performance and longevity.

SolarScreen Pakistan offers the best product warranties available on the market. In the unlikely event of a defect, we offer product replacement and installation free of charge.

# Benefits of our products

## Window Films

Most people consider double-glazed windows to be the best solution for heat control. A study of many different double-glazed windows in Pakistan found these windows only stop between 28% and 30% on the solar heat. Adding imported low-E glass adds a great deal of cost, but the performance benefits are not substantial.

Since 54% of the sun's heat is carried in Infrared rays, our climate control window films have high Infrared heat rejection as a primary function. Our products also offer 99% rejection of harmful UV rays and anti-glare properties.

Our films have a heat absorbing or heat reflecting rejection layer. This layer also reflects indoor radiant heat, to prevent heat loss. This enables our films to keep your space cooler in the summer and warmer in the winter.

We stock the largest range of climate control window films in Pakistan, including nano-ceramic, metal sputtering, nano-silver, dyed and carbon films.

This variety helps us to cater to the performance and aesthetic requirements of every client, and enables us to cater to every type of application including industrial, residential, retail, corporate, health and food services sectors.

### AFFORDABILITY

We are able to provide window films installation at an affordable cost due to our large scale production.

### RETURN ON INVESTMENT

Industrial applications benefit from a Return On Investment (ROI) period of 11-12 months. Residential and Retail applications usually get their investment returned in 2 years

### BILL SAVINGS

As the energy prices increase, our products enable you to reduce your heating and cooling bills by as much as 25%.

Did you know some of the most well known buildings in the World, including the Eiffel Tower and the European Parliament building rely on climate control window films to help maintain ideal temperature.

# Our Projects

## Climate Control Window Films

A glimpse of few of the projects we have carried out. We pay special attention to the customer's requirements to ensure the solution solves the problem. Our broad range of products helps us to cater to your every requirement.

### Defence Villas, Islamabad

Residential, Z8 and B series films

30 villa owners at this development have so far chosen SolarScreen Z8 Series climate control film to counter the heat gain at their properties. We delivered an amazing change to the indoor comfort.

### Monal, Lahore

Restaurant, Z8 series film

The 32 tons of air conditioning capacity were not enough to sufficiently cool this restaurant that offers panoramic views of the city through its glass walls.. SolarScreen came to the rescue and made the indoor climate pleasant for the diners.

### House of Charizma

Retail, X9 series film

The glass front of the retail stores of this clothing brand were a big source of heat gain. Our X9 series ceramic films reduced the window heat gain by 71% while keeping a perfect view into the stores.

## F1 Traxx

This kids play park at Lake View Park, Islamabad suffered from intolerance heat gain. Our invisible Z8 series film application transformed it into a comfortable playing zone.

## D Watson

D Watson stores choose our Z8 series climate control window film to increase shopper comfort. For instance, the pictured store in i10, Islamabad benefitted from a remarkable decrease in the indoor temperature.

## Metro Supermarket

Large glass fronts make the Metro store appealing and aesthetically pleasing, but resulted in uncomfortable heat gain. We were able to reduce the cooling bills by 28%.

## Institute of Rural Management

As an NGO run on donor funding, IRM reached out to SolarScreen Pakistan to help reduce their cooling costs. We delivered a more comfortable working environment, courtesy our Z8 series climate control film.

## Najeeb House

Set atop the hills of Banigala and offering panoramic views of Islamabad, the all glass walls of this property made it impossible for the air conditioning to deliver a comfortable living space. SolarScreen delivered on its promise.

## Timmy's Fast Food

The management at Timmy's Fast Food chain trusted SolarScreen Pakistan to treat all their 13 franchises across Pakistan. Our Z8 delivered the perfect customer comfort and helped reduce the cooling bills.

# Where We Work

Our Office Locations

---

Through its operations in 3 major cities of Pakistan, any city of Pakistan is within easy reach of SolarScreen Pakistan.

Our head office is in Islamabad, where our top management is based. Through its regional operations directors, SolarScreen is able to take business decisions locally throughout Pakistan. Our service standards are strictly controlled and KPIs monitored to ensure a seamless business operation.

Our aim in 2020 and onwards is to open outlets in more cities and Pakistan and expand in the Middle-East, to ensure an even swifter service delivery timeframe. With the global temperatures on the rise due to global warming, we want to ensure our products and services are available to everyone.

*Choose SolarScreen as your clean and green solution to counter extreme temperatures.*

# What Clients Say

Verifiable, Independent Testimonials

Client satisfaction is most important for us when recommending any solution or carrying out any installation. Our teams will go the extra mile to cater to client requirements. It is why we are able to develop trust and understanding with our clients.

## Thank you SolarScreen

*"My upper portion lounge was unbearable to sit in, and my bed room too. I got help from SolarScreen Pakistan. I must say there's significant change in the temperature inside both rooms. The team is very professional. I am happy I invested in SolarScreen. Their Z series does work".*

■ **Sana Sharif,** Resident, F-7, Islamabad.

## The best services you can find in twin cities

*"I am really impressed by their work and I assure their product and its quality are amazing. It made a significant heat difference in my house. This is what you need".*

■ **Fahad Mumtaz** Resident, Doctor's Town, Rawalpindi.

## Best in business

*"It is the best insulator film available at less rates ..other vendor are very expensive. Best for those houses that have big window panes . Their Z series is very effective for residential purpose".*

■ **Col. Kashif Hasan** Resident, Defence Villas, Islamabad.

## Effective car products

*"Got them on my Corolla today. I definitely felt reduced heat entry into cabin as it was a very hot day (43c), but cabin felt better, not biting one on entry especially when car is parked under direct sun for an hour. While driving also did not feel scorching from sunlight around 3:30 pm".*

■ **Masroor Gilani,** Car Club Member, Islamabad.

## Excellent services with amazing plans

*"Quick and quality service at your door steps. Got automotive windows tints installed in my car, visible difference in heat reduction, highly recommended".*

■ **Ahmed Nauman Chaudhry,** Car Enthusiast, Lahore.
